RE: In the Matter of applications of AT&T Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations (WT Docket No. 11-65).

Dear Chairman Genachowski:

Founded in 1985, the Vietnamese American Chamber of Commerce of Orange County (VACOC) is a non-profit organization made up of local business owners and corporate representatives throughout Southern California. We strive to provide a strong network that enables businesses to advertise, build partnerships, and give back to the greater community. In addition, we help new businesses grow and established corporations to thrive. Through advanced technologies, public events and philanthropic sponsorships, VACOC bolsters business in Southern California.

In this letter I wish to reiterate what I have said before. Both as President of VACOC and as a T-Mobile customer, I believe the recent AT&T acquisition presents a great opportunity for businesses to grow through a larger wireless network. This merger will help pave the way for Orange County companies to prosper. I hope the FCC will act in the interests of the residents of Orange County by approving the merger.

Today's most sought after technology is broadband. We know that even more advancements in communications are yet to come. In the meantime we welcome the acquisition of T-Mobile by AT&T, because if this transaction is approved AT&T has committed to expanding its wireless broadband (LTE) network access to almost all of the population in the United States, helping our businesses work better every day.

The marriage of AT&T and T-Mobile promises great things for America's sixth largest county. This union provides the technological advancements businesses need to compete on a global level. Right now more than ever we need strategic mergers like this one to help us navigate a tumultuous economy. I heartily endorse this merger and take this opportunity to communicate my enthusiasm for it to you at the FCC.

Respectfully,
